

## Background and methodology

The aim of the Emergency Needs Tracking (ENT) System is to track the key priority needs of internally displaced persons (IDPs) in northwest Syria, as well as identifying communities with households in direct need of humanitarian assistance. The ENT assesses communities that have experienced any of the following in the three days prior to data collection: more than 40 IDP arrivals, natural hazards (including storms, fires, and flooding), conflict escalation, or any other event which impacts humanitarian needs. This information should serve to better inform immediate humanitarian operations, as well as provide a wider contextual understanding of the ongoing situation. As the humanitarian situation remains complex, it is critical to fill information gaps across sectors to ensure a well-coordinated humanitarian response.

Data was collected between 27 December and 30 December. Information was collected via a Key Informant (KI) methodology with one KI interview conducted per community. Findings should be considered indicative only. 36 communities, including 4 camps, were assessed overall across Western Aleppo, Hama and Idlib governorates. **The full dashboard can be accessed [here](#) and the full catalogue of datasets can be accessed [here](#).**

## Protection

**Percentage of assessed communities in which KIs reported the presence of newly-arrived IDPs with the following vulnerability types:<sup>1</sup>**

	%
Elderly headed households	42%
Women headed households	39%
Orphans	11%
Disabled headed households	8%
Individuals with disabilities travelling alone	6%
Women travelling alone	3%
Child headed households/children travelling alone	3%

## Food security

**Most commonly reported food sources for newly-arrived IDPs in assessed communities:<sup>1 3</sup>**

1	Stores/markets in this community	75%
2	Relying entirely on food stored previously	69%
3	Stores/markets in other communities	58%

**98%** of newly-arrived IDP households (306) were reportedly eating one meal or more per day

## Shelter

**Number and percentage of newly-arrived IDP households by shelter type:<sup>2</sup>**

	#	%
Solid/finished buildings	181	58%
Functioning tents	70	22%
Unfinished/ damaged buildings	59	19%
Designated collective centers	0	0%
Residing without any form of shelter	0	0%
Makeshift shelter	0	0%

## NFI Non-Food Items (NFIs)

**Number and percentage of newly-arrived IDP households without the following NFIs:<sup>2</sup>**

	#	%
Households without sufficient fuel for heating	215	69%
Households without fuel for cooking	157	50%
Households without bedding	41	13%
Households without sufficient mattresses	37	12%
Households without sufficient cooking utensils	33	11%

## Livelihoods

**Most commonly reported currency used for purchasing basic/essential commodities:<sup>3</sup>**

1	Turkish Lira	100%
2	Syrian Pound	0%
3	United States Dollar	0%

## Health

**95%**

of newly-arrived IDP households (297) reportedly could access essential healthcare

## [View the interactive dashboard here](#)

This factsheet is supplementary to the interactive ENT dashboard which is updated on a daily basis with up-to-date information on humanitarian needs across northwest Syria.

<sup>1</sup> KIs could choose from multiple answer options so answers may exceed 100%

<sup>2</sup> Refers to percentage of total newly-arrived IDP households

<sup>3</sup> Refers to percentage of assessed communities

## IDP Priority Needs

Top ranked priority needs for newly-arrived IDPs  
(by % of **36 assessed communities** where KIs selected a first, second, and third priority need for IDPs):<sup>3</sup>

Type	First priority need (# of assessed communities reporting)	First priority need (% of assessed communities reporting)	Second priority need (# of assessed communities reporting)	Second priority need (% of assessed communities reporting)	Third priority need (# of assessed communities reporting)	Third priority need (% of assessed communities reporting)
Winterisation kits	7	19%	9	25%	15	42%
Multi-purpose cash grants	25	69%	5	14%	1	3%
Cash for rent	0	0%	4	11%	1	3%
New/additional shelters	1	3%	3	8%	1	3%
Food rations (in-kind)	3	8%	9	25%	13	36%
Cash for work	0	0%	0	0%	2	6%
Employment support	0	0%	2	6%	1	3%
NFI kits	0	0%	1	3%	1	3%
Water provision/rehabilitation	0	0%	1	3%	0	0%
Latrine and or bathing provision/rehabilitation	0	0%	1	3%	0	0%
Hygiene kits	0	0%	1	3%	0	0%
Education support	0	0%	0	0%	1	3%

## Humanitarian Assistance

92%

In 33 communities, KIs reported that the preferred modality of assistance for newly-arrived IDPs was cash assistance

97%

In 35 communities, KIs reported that no barriers were present for humanitarian actors when accessing the community

## Water, Sanitation and Hygiene (WASH)

Most commonly reported drinking water sources for newly-arrived IDP households in assessed communities:<sup>1, 3</sup>

- 1 Informal water trucking conducted by private citizens 58%
- 2 Formal water trucking conducted by authorities or an NGO 36%
- 3 Combination of water network and private water trucking 17%

8% of newly-arrived IDP households (25) reportedly did not have access to a sufficient quantity of water for purposes such as cooking, bathing, and washing

21% of newly-arrived IDP households (65) reportedly did not have access to functioning hand-washing facilities with water and soap

1% of newly-arrived IDP households (3) reportedly did not have access to a functioning toilet

44% In 16 communities, KIs reported that soap and hygiene items are too expensive for some newly-arrived IDPs

### About REACH

REACH Initiative facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. The methodologies used by REACH include primary data collection and in-depth analysis, and all activities are conducted through inter-agency aid coordination mechanisms. REACH is a joint initiative of IMPACT Initiatives, ACTED and the United Nations Institute for Training and Research - Operational Satellite Applications Programme (UNITAR-UNOSAT).
