² Tentative dates for the completion of the final outputs.

General Objective	Inform evidence-based humanitarian programming and service delivery in the short and long-term at the urban area-level, ³ specifically within locations where Community Resource Centres (CRCs) ⁴ are planned.		
Specific Objective(s)	<ul style="list-style-type: none"> ● Define and profile the geographic area selected for assessment⁵ ● Identify and map the availability and accessibility of services within the area of assessment, highlighting key gaps and barriers to services provision ● Gauge the perceptions and expectations of residents regarding service delivery and reconstruction efforts. ● Identify priority multi-sectoral needs of the population residing in the targeted urban area at the household level 		
Research Questions	<ol style="list-style-type: none"> 1. What information about the area is already available, in particular the availability of services and functional infrastructure? 2. What is the current availability, functionality, and accessibility of services and infrastructure in the area, and how does this compare to the pre-crisis period? 3. Where are functional services and infrastructure located within the area of assessment? <ol style="list-style-type: none"> a. What coping mechanisms are residents in the area using in response to a lack of adequate services? 4. What are the primary obstacles to accessing services, from the perspective of community members? 5. What are the primary obstacles to delivering services, from the perspective of providers? 6. What is the demographic profile of the population within the area of assessment? 7. What are the multi-sectoral needs of the population within the area of assessment? 		
Geographic Coverage	<p>The Iraq Area-Based Assessments (ABAs) will target urban areas within locations where Community Resource Centres are planned. As of April 2018, ABAs are planned in the following locations:</p> <ul style="list-style-type: none"> ● Mosul Al Jadida municipality ● Telafar city 		
Secondary data sources	<p>Secondary Data:</p> <ul style="list-style-type: none"> ● UN Habitat Mosul Portal ● Population data (e.g. IOM Displacement Tracking Matrix) ● Data and reports from previous needs and vulnerability assessments (e.g. WFP MVAM, UNHCR Protection Monitoring, etc.) ● General background and context research on areas being targeted for assessment ● Geo-spatial data (e.g. UNOSAT satellite imagery) ● Tools and Lessons Learned from previous ABAs 		
Population(s)	<input type="checkbox"/> IDPs in camp	<input checked="" type="checkbox"/>	IDPs in informal sites
	<input checked="" type="checkbox"/> IDPs in host communities	<input type="checkbox"/>	IDPs [Other, Specify]
	<input type="checkbox"/> Refugees in camp	<input type="checkbox"/>	Refugees in informal sites

³ As the definition of “urban area” is heavily dependent on the context in which a planned CRC is located, it can range from a municipality within a city to a smaller city and adjacent settlements. Therefore, the scope of the area will be determined on a case-by-case basis, which will be outlined in the annexed methodology notes. As assessment areas will be selected by CRC partners, and as there are no reliable population figures for settled areas of Iraq, no minimum size can be identified.

⁴ The CRCs will act as a platform for assistance and interaction between communities and public institutions supporting local populations through an area-based multi-sectoral approach.

⁵ Depending on the scope of assessment, some urban areas will be assessed in their entirety, while in other urban areas, a selected area (neighbourhood, municipality) will be selected for assessment.

2. Rationale

2.1. Rationale

During 2018, Iraq will continue to see an increasing rate of returns of internally displaced populations to their areas of origin. However, humanitarian actors are not anticipating these returns to occur uniformly across all areas of the country, highlighting the need to further explore barriers to returning as well as requisite conditions for safe and voluntary returns. Through an area-based approach, humanitarian actors can operate at a more localized level to design a response that is geographically targeted, inclusive of a range of local, international, and governmental actors, and is inter-sectoral in its programme delivery.

To inform this highly collaborative, coordinated, and localized response, humanitarian, stabilization, development and government actors require a strong evidence base that is multi-sectoral, and can inform short, medium and long-term interventions in the area by the wide range of actors outlined above. In order to provide this base of evidence, the ABA framework will combine secondary data with primary data collection to fill informational gaps regarding current available information regarding the provision of services, core needs, and operational actors within the area; community perceptions of service provision within their area; detailed service provider overviews of the dynamics affecting the current provision of services; and a detailed, representative assessment of needs and vulnerabilities at the household level.

3. Methodology

2.1. Methodology overview

The ABA will employ a mixed methods approach that combines the analysis of secondary data with both quantitative and qualitative primary data collection methods in the form of:

- Key Informant Interviews (KIIs)
- Community group discussions (CGDs)
- Participatory mapping
- Household-level surveys

As of April 2018, an ABA is ongoing in the Mosul al Jadida municipality of west Mosul, with an additional JRAM planned for Telafar city with a tentative start date in July. As noted above, the geographic scope of the ABAs will follow the setup of CRCs by operational partners throughout Iraq.ADD

Each ABA will begin with a comprehensive secondary data review (SDR), with the aim of capturing information that already exists about the area targeted for assessment. The availability of existing information will, in turn, inform the primary data collection methods that will be utilized. As a consequence, not every data collection method listed above will be utilized within every separate ABA, in order to avoid duplication of effort.

To begin with, these assessments will be coordinated and implemented by REACH under the framework of the Community Resource Centre Steering Committee (CRC SC) which is chaired by the Returns Working Group (RWG) in Iraq. After consultation with the CRC SC, it was determined that the ABA will be carried out in all areas in which CRCs will be established, in order to provide a comprehensive baseline for the operations related to that CRC. However, it is important to note that not all ABAs will be conducted by REACH – rather, REACH will provide training to CRC partners using a toolkit to be developed by REACH in collaboration with the CRC SC. Core assessment indicators, data collection methodology, and analysis of the collected data will be aligned with the Multi-Sector Response Framework (MSRF), a guidance document

developed by the RWG with input from relevant clusters to facilitate coordinated area-based interventions in support of Iraq's conflict-affected populations.

The following sectors will be addressed by the various components of the ABA; solid waste management, provision of water, provision of electricity, education, healthcare, livelihoods, food security, assistance, shelter and protection. Some of these categories will be addressed by both the qualitative and quantitative components of the assessment, while some will only be covered by the quantitative assessment.

Following the completion of primary data collection, REACH will conduct preliminary analysis and present findings at a joint analysis workshop, bringing together relevant humanitarian and stabilisation actors to facilitate a nuanced and contextualized analysis of the data. Based on the discussions and feedback received through the joint analysis exercise, REACH will produce multiple research outputs, including a final cleaned dataset, thematic maps, area profiles, and a final report.

2.2. Population of interest

All population groups⁹ residing in the urban area assessed, including:

- Internally displaced persons (IDPs) residing in and out of camps – including those in informal sites
- Non-displaced
- Returnees

2.3. Secondary data review

A secondary data review (SDR) will be conducted by REACH in order to support the implementation of primary data collection. This SDR will include a thorough examination of the following:

- Population data (e.g. IOM Displacement Tracking Matrix)
- Data and reports from previous needs and vulnerability assessments (e.g. WFP MVAM, UNHCR Protection Monitoring, etc.)
- General background and context research on areas being targeted for assessment
- Geo-spatial data (e.g. UNOSAT satellite imagery)
- Tools and Lessons Learned from previous ABAs

2.4. Primary data collection

2.4.1. Sampling

Selection of areas to be assessed

- The urban area of assessment (entire city, municipality, neighbourhood) will be chosen in collaboration with the CRC Steering Committee. As the definition of "urban area" is heavily dependent on the context in which a planned CRC is located, it can range from a municipality within a city to a smaller city and adjacent settlements. Therefore, the scope of the area will be determined on a case-by-case basis, which will be outlined in the annexed methodology notes. As assessment areas will be selected by CRC partners, and as there are no reliable population figures for settled areas of Iraq, no minimum size can be identified.

Sampling: Semi-Structured Key Informant Interviews (KII) and Community Group Discussions (CGD)

Purposive sampling methods will be employed for the KII and CGD components of the assessment. REACH enumerators will utilize existing KI networks to identify *mukhtars*¹⁰ and other community leaders with comprehensive knowledge of their area of responsibility, and will then use a snowballing approach to identify additional participants until all (if possible) identified locations (whether neighbourhood or village) within the assessment area are represented by a community leader

⁹ These population groups are categorized using IOM DTM definitions: IDPs are those who have been displaced out of their subdistrict of origin, and remain in their area of displacement; returnees are those who were displaced from their subdistrict of origin, but have returned; non-displaced are those who were not displaced from their subdistrict of origin.

¹⁰ In the context of Iraq, each community (whether neighborhood, village, or town) is represented by a mukhtar. For the purposes of these KIIs, mukhtars represent the most prominent respondent type.

KI. These KIs will provide information concerning demographics, as well as the availability and functionality of services and public infrastructure within their area of knowledge/responsibility.

Regarding CGDs, REACH teams will again source participants with support from identified community leader KIs, ensuring that CGDs are held in a variety of distinct locations (whether neighbourhood, town or village) within the area of assessment, utilizing data previously gathered from community leader KIs in order to ensure that CGD locations represent a population types, needs, and levels of access to services. CGD participants will be selected in consultation with community leaders, and will equally represent both male and female respondents whenever possible within the cultural context. In selecting participants for the CGDs, community leaders facilitating the process will be requested to select individuals with specific sectoral knowledge, particularly doctors, teachers, engineers, and municipal employees. The number of total CGDs conducted will largely depend on the size of the assessment area and the capacity of the REACH team.

For the purposes of collecting expert feedback on the provision of services in the area of assessment, KIs will also be conducted with five subject matter experts each in the fields of healthcare, education, water, electricity, and solid waste disposal.¹¹

Sampling: Structured Household-level Needs Assessment

Accurate population data for most areas of Iraq is limited, both in terms of overall population, figures by population group (IDP, non-displaced, returnee etc.) and at the neighbourhood/municipal/village level. Therefore, to facilitate the development of a sampling framework, REACH will use information regarding population numbers, population groups present, and distribution of population groups provided by KIIs conducted in the qualitative portion of the assessment to fill these information gaps. This qualitative data can also be used to triangulate secondary data from other sources. However, even these methods are unlikely to produce population data that is accurate enough for the drawing of a representative sample frame.

Once this exercise is completed, sampling for the household-level assessment will follow one of three scenarios:

1. **Population data, population group data, and density data available:** A sample frame will be drawn for the area of assessment based on identified population figures, stratified for all population groups present (stratified area-wide sample). GPS points will be randomly distributed throughout the residential sections of the area of assessment, weighting for population density. Expected to be statistically representative at the population group level with a 95% level of confidence and a 10% margin of error, and representative at the area level with a 95% level of confidence and a 5% margin of error.
2. **Population data available and density data available, population group data unavailable:** A sample frame will be drawn for the area of assessment based on identified population figures (unstratified area-wide sample). GPS points will be randomly distributed throughout the residential section of the area of assessment, weighting for population density. Expected to be statistically representative at the area level with a 95% level of confidence and a 5% margin of error.
3. **Population data and population group data available, and population density unavailable:** A sample frame will be drawn for the area of assessment based on identified population figures, stratified for all population groups present (stratified area-wide sample). GPS points will be randomly distributed throughout the residential sections of the area of assessment. Expected to be statistically representative at the area level with a 95% level of confidence and a 5% margin of error.
4. **Population data, population group data, and population density data unavailable:** A sample frame will be drawn for the area of assessment assuming an infinite population (unstratified area-wide sample). GPS points will be randomly distributed throughout the residential sections of the area of assessment. Expected to be statistically representative at the area level with a 95% level of confidence and a 5% margin of error.

2.4.2. Field Data Collection

Qualitative Data Collection

Key Informant Interviews (KIIs)

- a. Key informant interviews (KIIs) with mukhtars and other community leaders, exogenous humanitarian and stabilization actors and municipal and local service providers.

¹¹ Sector experts include: healthcare (doctors, nurses, pharmacists, medical assistants); education (teachers, head teachers, education ministry employees); water (municipal employees, water engineers, NGO employees); electricity (municipal employees, ministry employees, NGO employees); solid waste (municipal employees, NGO employees).

- b. Interviews will be conducted in person and by phone, depending on logistics, resources, and security/access restrictions.
- c. All KIIs will be conducted using a paper-based questionnaire translated into Arabic, with debriefing of enumerators conducted by REACH assessment staff.
- d. When possible and relevant, participatory mapping exercises will be conducted with service provider KIIs in order to identify the location and functionality of key infrastructure.

Community Group Discussions (CGDs)

- a. Community group discussions will serve to contextualize secondary data and information provided by KIIs, as well as to obtain nuanced information regarding perceptions and expectations related to service delivery.
- b. Participatory mapping exercise to identify the availability and functionality of services within their area.
- c. All CGDs will be conducted using a paper-based questionnaire translated into Arabic, with debriefing of facilitators conducted by REACH assessment staff.
- d. All CGDs will be stratified by gender, with female enumerator staff conducting all CGDs with female participants.

Quantitative Data Collection

Household Needs Survey

- a. Data collection will be implemented both by REACH enumerators and by partner enumerators where possible, who will collect household-level data through a comprehensive multi-sectorial tool built from the indicators in the MSRF. Overall coordination of joint data collection and data cleaning will be led by REACH.
- b. Enumerators will record interview responses digitally using KoBo Collect, an android-based mobile data collection application. All indicators will either be drawn directly from or aligned with the MSRF.¹²

Partner-driven data collection on all assessments

For the purposes of quantitative household-level data collection, REACH will be enlisting the support of partner agencies when relevant. Partners will be identified based on their operational presence in areas selected for assessment, and their capacity to conduct the assessment within the data collection period. All partner enumerators will be fully trained by REACH, and all coordination of the partner data collection and data cleaning process will be carried out by REACH assessment staff.

2.5. Data Processing & Analysis

Qualitative data generated through key informant interviews and CGDs will be synthesized and organized in line with the qualitative data analysis framework. Data will be triangulated with secondary sources, as well as with the information gathered in the quantitative assessment, and follow-up data collection will be conducted if deemed necessary to address inconsistencies or information gaps.

All appropriate methods of quantitative data analysis will be used to provide analytical depth to the findings. Quantitative data will be analysed by a review of descriptive statistics in addition to more advanced statistical analysis where appropriate, through the use of SPSS or other software packages. Findings will be presented at the population group level (when possible) to enable a comparative analysis of needs and perceptions, utilizing statistical significance testing to analyse population differences.

3. Roles and Responsibilities

Table 2: Description of roles and responsibilities

<i>Task Description</i>	<i>Responsible</i>	<i>Accountable</i>	<i>Consulted</i>	<i>Informed</i>
-------------------------	--------------------	--------------------	------------------	-----------------

¹² At present, for future sites additional actors might provide inputs to questionnaire.

Research design	Assessment Manager (AM)	AM	HQ Research Design Unit, CFP, RWG, AWG	e.g. Cluster Coordinator
Supervising data collection	AO	AO	AM	CC
Data processing (checking, cleaning)	AO	AM	AM	CC
Data analysis	JAO	AO	AM	IMPACT HQ
Output production	AO	AO	AM	IMPACT HQ
Dissemination	AO	AO	AM	IMPACT HQ
Monitoring & Evaluation	AO	AO	AM	IMPACT HQ
Lessons learned	AO	AO	AM	IMPACT HQ RWG CRC Steering Committee

Responsible: the person(s) who executes the task

Accountable: the person who validates the completion of the task and is accountable of the final output or milestone

Consulted: the person(s) who must be consulted when the task is implemented

Informed: the person(s) who need to be informed when the task is completed

NB: Only one person can be Accountable; the only scenario when the same person is listed twice for a task is when the same person is both Responsible and Accountable.

		227	KII	Expert KI	Healthcare	What is being done to improve these residents access to healthcare?
		228	KII	Expert KI	Healthcare	In general, within your area of knowledge, how does access to healthcare currently differ from the pre-ISIL period? What are the primary barriers to accessing healthcare?
		229	KII	Expert KI	Healthcare	In general, within your area of knowledge, what is currently being done to address barriers to accessing healthcare?
		230	KII	Expert KI	Healthcare	What organisations (government, NGO, civil society) are taking steps to address these barriers?
		231	KII	Expert KI	Healthcare	In your opinion, what more should be done within your area of knowledge to improve access to education?
		232	KII	Expert KI	Healthcare	Who is responsible for taking these steps to improve access to healthcare?
		233	KII	Expert KI	Healthcare	What are the primary barriers to taking these steps to improve access to healthcare?
	What is the current availability, functionality, and accessibility of waste management services and infrastructure in the targeted urban area and how does this compare to the pre-crisis period?	234	KII	Expert KI	Solid Waste Removal	What is your area of knowledge regarding waste management? What neighbourhoods specifically?
		235	KII	Expert KI	Solid Waste Removal	Is there a functioning solid waste collection system in the area? If yes: How often is solid waste collected? Does the frequency depend on the neighbourhood? Who collects the solid waste? Government NGO Private company Does it cost money for residents? Is the solid waste collection sufficient to meet the needs of the community? If no: why not?
		236	KII	Expert KI	Solid Waste Removal	How does the functionality of the solid waste collection system differ from the pre-ISIL period? Organization responsible? Frequency? Areas with functional collection services?
		237	KII	Expert KI	Solid Waste Removal	Are there certain neighbourhoods where waste is not being collected? If so, which neighbourhoods? Why?
		238	KII	Expert KI	Solid Waste Removal	In general, are solid waste collection services sufficient to meet the needs of the community?
		239	KII	Expert KI	Solid Waste Removal	Within your area of knowledge, what are the main barriers preventing solid waste collection services from meeting the needs of the population?
		240	KII	Expert KI	Solid Waste Removal	Within your area of knowledge, what is currently being done to address barriers to waste collection?
		241	KII	Expert KI	Solid Waste Removal	What organisations (government, NGO, civil society) are taking steps to address these barriers?

		242	KII	Expert KI	Solid Waste Removal	In your opinion, what more should be done within your area of knowledge to improve waste collection?
		243	KII	Expert KI	Solid Waste Removal	Who is responsible for taking these steps to improve waste collection?
		244	KII	Expert KI	Solid Waste Removal	What are the primary barriers to taking these steps to improve waste collection?
		245	KII	Expert KI	Solid Waste Removal	Where is waste taken after it is collected?
		246	KII	Expert KI	Solid Waste Removal	Was this the case before ISIL?
		247	KII	Expert KI	Solid Waste Removal	Is the waste burned at these locations?
		248	KII	Expert KI	Solid Waste Removal	Are there any negative health effects in the area from the burning of solid waste?
What is the current availability, functionality, and accessibility of water services and infrastructure in the targeted urban area and how does this compare to the pre-crisis period?		249	KII	Expert KI	Water	What is your area of knowledge regarding water management? Which neighbourhoods specifically?
		250	KII	Expert KI	Water	What are the sources of water in this area?
		251	KII	Expert KI	Water	Are these sources different compared to the pre-ISIL period?
		252	KII	Expert KI	Water	Which of these sources are safe to drink? Is this different compared to the pre-ISIL period?
		253	KII	Expert KI	Water	Are residents drinking water that is not safe to drink? Why? From what sources? Was this happening in the pre-ISIL period as well?
		254	KII	Expert KI	Water	Is the water network generally functioning in this area?
		255	KII	Expert KI	Water	Which areas in particular are not functioning, to your knowledge?
		256	KII	Expert KI	Water	What neighbourhoods?
		257	KII	Expert KI	Water	Reason for non-functionality?
		258	KII	Expert KI	Water	What is being done to repair the functionality of the water networks in this area? Who is doing the work?
		259	KII	Expert KI	Water	What are the main barriers to repairing the functionality of these water networks?
		260	KII	Expert KI	Water	Are there functioning water treatment plants servicing the neighbourhood?
		261	KII	Expert KI	Water	Are there plants that are partially functioning?
		262	KII	Expert KI	Water	Are there plants that are not functional that were functioning in the pre-ISIL period?
		263	KII	Expert KI	Water	Why are they not functional?
		264	KII	Expert KI	Water	What is being done to make these plants functional again?
		265	KII	Expert KI	Water	Is there damage to the water pipe network in the area?
		266	KII	Expert KI	Water	What effects does this damage have on the provision of water?
		267	KII	Expert KI	Water	Which areas are affected?
		268	KII	Expert KI	Water	Is the damage being repaired? If yes: by whom?
		269	KII	Expert KI	Water	Is the provision of public water in the neighbourhood generally considered to be sufficient to meet the needs of the population?

		270	KII	Expert KI	Water	What are the main causes of water shortages in this area?
		271	KII	Expert KI	Water	Were there water shortages in the pre-ISIL period?
		272	KII	Expert KI	Water	If yes: what were the causes of those shortages?
		273	KII	Expert KI	Water	What are the main barriers to the provision of water in the neighbourhood?
		274	KII	Expert KI	Water	What is being done to address these barriers?
		275	KII	Expert KI	Water	Are any organisations (government, NGO, civil society) taking steps to address these barriers?
		276	KII	Expert KI	Water	In your opinion, what more should be done to improve access to water in the neighbourhood?
		277	KII	Expert KI	Water	Who is responsible for taking these steps to improve water provision?
		278	KII	Expert KI	Water	What are the primary barriers to taking these steps to improve water provision?

Annex 3.2: Quantitative data analysis plan:

Research questions	Sub-Research questions	IN #	Data collection method	Indicator Group / Sector	Indicator / Variable	Questionnaire question	Questionnaire responses	Data collection level
N/A	N/A	1	HH interview (KoBoCollect)	Enumerator questions	Enumerator name	Enumerator's name	text	HH
		2	HH interview (KoBoCollect)	Enumerator questions	Group number	Group number	integer	HH
		3	HH interview (KoBoCollect)	Enumerator questions	Grid	Which grid are you in?	integer	HH
		4	HH interview (KoBoCollect)	Enumerator questions	Location name	Name of the current location	select_one location	HH
		5	HH interview (KoBoCollect)	Enumerator questions	GPS location	Record the current location within 5 meters of accuracy	geopoint	HH
	N/A	6	HH interview (KoBoCollect)	Interviewee questions	Interviewee age	What is the age of the interviewee?	integer	HH
		7	HH interview (KoBoCollect)	Interviewee questions	Interviewee gender	What is the gender of the interviewee?	select_one sex	HH
		8	HH interview (KoBoCollect)	Interviewee questions	% of interviews conducted to the HH	Are you the head of household?	select_one Yes_No	HH
		9	HH interview (KoBoCollect)	Interviewee questions	Consent	Do you agree to participate?	select_one Yes_No	HH
What is the demographic profile of the	N/A	10	HH interview (KoBoCollect)	Household Profile	% of HH living in subdistrict prior to January 2014	Was your household living in this subdistrict prior to January 2014?	select_one Yes_No	HH

population within the area of assessment?	11	HH interview (KoBoCollect)	Household Profile	% of households being displaced from sub-district since january 2014	Have you been displaced from this sub-district since January 2014?	select_one Yes_No	HH
	12	HH interview (KoBoCollect)	Household Profile	Note for enumerator	This household is a returnee household.	note	HH
	13	HH interview (KoBoCollect)	Household Profile	Note for enumerator	This household is non-displaced.	note	HH
	14	HH interview (KoBoCollect)	Household Profile	% of IDP households	Did you move to this subdistrict because of the conflict?	select_one Yes_No	HH
	15	HH interview (KoBoCollect)	Household Profile	Note for enumerator	This household is an IDP household.	note	HH
	16	HH interview (KoBoCollect)	Household Profile	Duration of displacement	When did you return to this subdistrict after your most recent incidence of displacement?	date	HH
	17	HH interview (KoBoCollect)	Household Profile	Duration of displacement	When were you initially displaced from your sub-district?	date	HH
	18	HH interview (KoBoCollect)	Household Profile	Duration of displacement	When were you initially displaced from your sub-district?	date	HH
	19	HH interview (KoBoCollect)	Household Profile	Displacement status - IDP (secondarily displaced)	Is this location your first place of displacement?	select_one Yes_No	HH
	20	HH interview (KoBoCollect)	Household Profile	Displacement status - returnee	When did you arrive to this current location?	date	HH
	21	HH interview (KoBoCollect)	Household Profile	% of IDPs that originate from [insert governorate]	What governorate in Iraq were you living in before your displacement (forced to leave your home)?	select_one Governorate_ABA	HH
	22	HH interview (KoBoCollect)	Household Profile	% of IDPs that originate from [insert district]	What district in Iraq were you living in before your displacement?	select_one District_ABA	HH
	23	HH interview (KoBoCollect)	Household Profile	% of households hosting others	Are you hosting others in this house?	select_one Yes_No	HH
	24	HH interview (KoBoCollect)	Household Profile	% of households being hosted	Are you being hosted in this house?	select_one Yes_No	HH

		25	HH interview (KoBoCollect)	Household Profile	% of households living in the same home as prior to displacement	How long have you lived in this house?	date	HH
		26	HH interview (KoBoCollect)	Household Profile	% of households in which at least one member has any disability	Does any member of this household have any disability?	select_one Yes_No	HH
		27	HH interview (KoBoCollect)	Household Profile	% of households in which members have lost birth certificates, national ID cards or other forms of personal documentation	Is any civil document of any member of this household lost, damaged or expired?	select_one Yes_No	HH
		28	HH interview (KoBoCollect)	Household Profile	% of households in which at least one member needed to access health services or treatment	In the last three months, has any member of this household needed to access health services or treatment (including medicines)?	select_one Yes_No	HH
		29	HH interview (KoBoCollect)	Household Profile	# of individuals in HH	How many members are there in your household?	integer	HH
		30	HH interview (KoBoCollect)	Household Profile	# of individuals in family	How many members are there in your family?	integer	HH
		31	HH interview (KoBoCollect)	Household Profile	Relation of members with HH	What is [this person]'s relation to the head of household?	select_one relationship	HH
		32	HH interview (KoBoCollect)	Household Profile	Sex	What is the sex of [this person]?	select_one sex	HH
		33	HH interview (KoBoCollect)	Household Profile	Age	What is the age of [this person]?	integer	HH
		34	HH interview (KoBoCollect)	Household Profile	Marital status	What is [person]'s marital status?	select_one marital_status	HH
		35	HH interview (KoBoCollect)	Household Profile	Disability	Does the person have any disabilities?	select_one ynd	HH
		36	HH interview (KoBoCollect)	Household Profile	% of people with disabilities whose disability is related to an explosive hazard	Is [this person's] disability related to an explosive hazard (i.e. mines, UXO, IED)?	select_one YNDD	HH

		37	HH interview (KoBoCollect)	Household Profile	% of people with disabilities whose disability affects their ability to perform daily activities	Does the medical problem/disability affect the person's ability to perform daily living activities?	select_one ynd	HH
		38	HH interview (KoBoCollect)	Household Profile	% of HHs with at least one member either pregnant or lactating	Is the person pregnant or lactating?	select_one ynd	HH
		39	HH interview (KoBoCollect)	Household Profile	% of households with at least one member missing civil documentation	Are the civil documents of [this person] lost, damaged or expired?	select_one Yes_No	HH
		40	HH interview (KoBoCollect)	Household Profile	Top types of documentation that are lost, damaged, or expired	If yes, which types of documentation are lost, damaged, or expired?	select_multiple civil_documents	HH
		41	HH interview (KoBoCollect)	Household Profile	Top types of documentation that are lost, damaged, or expired - Other	if other, please describe	text	HH
		42	HH interview (KoBoCollect)	Household Profile	% of households with at least one member missing civil documentation due to displacement	Are the civil documents of [this person] lost, damaged or expired because of displacement?	select_one ynd	HH
		43	HH interview (KoBoCollect)	Household Profile	% of households with at least one member missing civil documentation due to displacement facing administrative obstacles	Did [this person] face legal and administrative obstacles to obtaining or replacing the documents?	select_one ynd	HH
		44	HH interview (KoBoCollect)	Household Profile	% of households with at least one member missing civil documentation able to replace the documents	Was [this person] able to replace the documents?	select_one ynd	HH

		45	HH interview (KoBoCollect)	Household Profile	% of children under 5 years whose birth has been registered with the authorities	Has the child [under 5 years old] the birth registered with the authorities?	select_one ynd	HH
		46	HH interview (KoBoCollect)	Household Profile	% of households needing to access health services in the 3 months prior to data collection	In the last three months, has [this person] needed to access health services or treatment (including medicines)?	select_one YNDD	HH
		47	HH interview (KoBoCollect)	Household Profile	% of households needing to access health services in the 3 months prior to data collection able to access the needed services or treatment	Was this person able to access the needed health services or treatment?	select_one YNDD	HH
		48	HH interview (KoBoCollect)	Household Profile	Primary barriers to accessing healthcare (top 3), among those accessing health services in previous 3 months	What difficulties, if any, did the person encounter?	select_multiple health_barriers	HH
		49	HH interview (KoBoCollect)	Household Profile	Prevalence of common health conditions: % of HHs with at least one member reporting [specific health conditions] in the past 30 days	In the past 30 days, has the person suffered from any the following health conditions or events?	select_multiple health_events	HH
		50	HH interview (KoBoCollect)	Household Profile	Prevalence of common health conditions: % of HHs with at least one member reporting [specific health conditions] in the past 30 days - Other	If other, please describe	text	HH

		51	HH interview (KoBoCollect)	Household Profile	Prevalence of common non-communicable diseases: % of HHs with at least one member reporting [specific health conditions]	Does this person have any of the following chronic health conditions?	select_multiple chronic	HH
		52	HH interview (KoBoCollect)	Household Profile	Polio vaccination rate	Has the child (under 5 years old) been vaccinated against Polio?	select_one Yes_No	HH
		53	HH interview (KoBoCollect)	Household Profile	Measles vaccination rate	Has the child (under 5 years old) been vaccinated against Measles?	select_one Yes_No	HH
		54	HH interview (KoBoCollect)	Household Profile	Penta 3 vaccination rate	Has the person (under 2 years old) been vaccinated against Penta 3?	select_one Yes_No	HH
		55	HH interview (KoBoCollect)	Household Profile	% of HHs with children aged between 6 -17 attending formal education during the school season	Is the person (6-17) currently attending formal education? (during school season)	select_one YNDD	HH
		56	HH interview (KoBoCollect)	Household Profile	% of HHs with children aged between 6 -17 attending a non-formal learning environment during school season	Is the person (6-17) currently attending a non-formal learning environment at least 3 days per week? (during school season)	select_one YNDD	HH
		57	HH interview (KoBoCollect)	Household Profile	Number of academic years missed since June 2014	Has the person (6-17) missed any years of formal education since June 2014?	select_one YNDD	HH
		58	HH interview (KoBoCollect)	Household Profile	Years of formal education missed during the period	How many years of formal education did [this person] (6-17) miss during this period?	integer	HH
		59	HH interview (KoBoCollect)	Household Profile	% of HHs with children aged between 6 -17 who have never attended school	Has the person (6-17) ever attended school?	select_one YNDD	HH
		60	HH interview (KoBoCollect)	Household Profile	Average time of not attending school (among children who have dropped out)	In what month and year did this person stop attending school?	date	HH

		61	HH interview (KoBoCollect)	Household Profile	Most reported reason for not attending school (top 3 answers)	If the person does not attend school, what were the reasons?	select_multiple reasons_not_attend	HH
		62	HH interview (KoBoCollect)	Household Profile	Most reported reason for not attending school (top 3 answers) - Other	If other, please describe	text	HH
		63	HH interview (KoBoCollect)	Household Profile		Will this person re-enroll in formal education?	select_one Yes_No	HH
		64	HH interview (KoBoCollect)	Household Profile	Demographics of HHs members working in the last 30 days % of households with children (aged 6-17) working during the previous 30 days	Is [this person] earning an income?	select_one Yes_No	HH
		65	HH interview (KoBoCollect)	Household Profile	Average of days worked in the past 30 days	In the past 30 days, for how many days did [this person] work?	integer	HH
		66	HH interview (KoBoCollect)	Household Profile	Most reported income source (top 3 answers) - Other	What's the income source?	select_multiple income_source	HH
		67	HH interview (KoBoCollect)	Household Profile	Most reported income source (top 3 answers) - Other	If other, please describe	text	HH
		68	HH interview (KoBoCollect)	Household Profile	Ratio of government employments to the civilian non-institutional population	Is [this person] a Governmental employee?	select_one Yes_No	HH
		69	HH interview (KoBoCollect)	Household Profile	% of HHs with adults (18+) actively seeking work in the community	Is [this person] actively seeking work?	select_one ynd	HH
		70	HH interview (KoBoCollect)	Household Profile	Most reported barriers in finding work (top 3 answers) - Other	What obstacles, if any, is [this person] facing in finding work?	select_multiple employment_barriers	HH

		71	HH interview (KoBoCollect)	Household Profile	Most reported barriers in finding work (top 3 answers)	If other, please describe	text	HH
What are the multi-sectoral needs of the population within the area of assessment?	What are the priority WASH needs of the population residing in the target area and do they show any variation across population groups?	72	HH interview (KoBoCollect)	WASH	Primary source of drinking water	What has been your primary source of drinking water during the last 7 days?	select_one water_source	HH
		73	HH interview (KoBoCollect)	WASH	Other	If other, please describe	text	HH
		74	HH interview (KoBoCollect)	WASH	% of household that report poor quality drinking water	Is this water source clean for drinking?	select_one Yes_No	HH
		75	HH interview (KoBoCollect)	WASH	% of population that use water treatment, by type	How do you treat your drinking water before consumption? Select all that apply	select_one safer_drinking	HH
		76	HH interview (KoBoCollect)	WASH	Other	If other, please describe	text	HH
		77	HH interview (KoBoCollect)	WASH	Primary source of water for cleaning/washing	What has been your primary source of water for cleaning and washing during the last 7 days?	select_one water_source	HH
		78	HH interview (KoBoCollect)	WASH	Other	If other, please specify	text	HH
		79	HH interview (KoBoCollect)	WASH	% of households with water tanks	Does your household have a functioning water tank?	select_one Yes_No	HH
		80	HH interview (KoBoCollect)	WASH	Capacity of water tank in liters	What is the capacity of your water tank in liters?	integer	HH
		81	HH interview (KoBoCollect)	WASH	% households with access to public, communal, private or no functional latrines by shared/unisex, privacy	What types of functional latrines do you currently have access to?	select_multiple latrines	HH
		82	HH interview (KoBoCollect)	WASH	% households with access to public, communal, private or no functional latrines by shared/unisex, privacy	Are communal or public latrines separate for men and women?	select_one Yes_No	HH
		83	HH interview (KoBoCollect)	WASH	% of households with access to latrines that have sufficient lighting	Does your household currently have access to a functioning latrine that has sufficient lighting?	select_one communal	HH

		84	HH interview (KoBoCollect)	WASH	% of households with access to latrines that are lockable from the inside	Does your household currently have access to a functioning latrine that is lockable from the inside?	select_one communal	HH
		85	HH interview (KoBoCollect)	WASH	% households with access to functional private, communal or public shower or bathing place	What types of functional shower/bathing area do you have access to?	select_multiple showers	HH
		86	HH interview (KoBoCollect)	WASH	% households with access to functional private, communal or public shower or bathing place	Are communal or public showers / bathing area separate for men and women?	select_one Yes_No	HH
		87	HH interview (KoBoCollect)	WASH	% of households with access to showers that have sufficient lighting	Does your household currently have access to a functioning shower or a bathing area that has sufficient lighting?	select_one communal	HH
		88	HH interview (KoBoCollect)	WASH	% of households with access to showers that are lockable from the inside	Does your household currently have access to a functioning shower/bathing area that is lockable from the inside?	select_one communal	HH
	What are the priority Food Security needs of the population residing in the target area and do they show any variation across population groups?	89	HH interview (KoBoCollect)	Food Security	Food Consumption Score	Over the last 7 days, how many days did your household consume the following food?	integer	HH
		90	HH interview (KoBoCollect)	Food Security	Food Consumption Score	Cereals, grains, roots and tubers: rice, pasta, bread, potato	integer	HH
		91	HH interview (KoBoCollect)	Food Security	Food Consumption Score	Legumes / nuts : beans, peanuts, lentils, nut, soy, and / or other nuts	integer	HH
		92	HH interview (KoBoCollect)	Food Security	Food Consumption Score	Milk and other dairy products: fresh milk / sour, yogurt, cheese, other dairy products (Exclude margarine / butter or small amounts of milk for tea / coffee)	integer	HH

		93	HH interview (KoBoCollect)	Food Security	Food Consumption Score	Meat, fish and eggs: goat, beef, chicken, fish, including canned ttna, and / or other seafood, eggs (meat and fish consumed in large quantities and not as a condiment)	integer	HH
		94	HH interview (KoBoCollect)	Food Security	Food Consumption Score	Vegetables and leaves: spinach, onion, tomatoes, carrots, peppers, green beans, lettuce, cabbages, egg plants, etc	integer	HH
		95	HH interview (KoBoCollect)	Food Security	Food Consumption Score	Fruits: banana, apple, lemon, mango, watermelon, apricot, peach, pineapple, passion, gishta, orange, avocado, wild fruits etc	integer	HH
		96	HH interview (KoBoCollect)	Food Security	Food Consumption Score	Oil / fat / butter: vegetable oil, palm oil, margarine, other fats / oil	integer	HH
		97	HH interview (KoBoCollect)	Food Security	Food Consumption Score	Sugar, or sweet: sugar, honey, jam, cakes, candy, cookies, pastries, cakes and other sweet (sugary drinks)	integer	HH
		98	HH interview (KoBoCollect)	Food Security	Food Consumption Score	Condiments / Spices: tea, coffee / cocoa, salt, garlic, spices, yeast / baking powder, lanwin, tomato / sauce, meat or fish as a condiment, condiments including small amount of milk / tea coffee.	integer	HH
		99	HH interview (KoBoCollect)	Food Security	# meal eaten per day, by adults	How many meals did the adults of this household eat yesterday?	integer	HH
		100	HH interview (KoBoCollect)	Food Security	# meal eaten per day, by children	How many meals did the children under 5 of this household eat yesterday?	integer	HH
		101	HH interview (KoBoCollect)	Food Security	% households that report the ability to cook	Is your household able to cook its food at least once a day, on average?	select_one Yes_No	HH
		102	HH interview (KoBoCollect)	Food Security	Main reason why they cannot cook	If not, what is the main reason?	select_one nocook	HH

		103	HH interview (KoBoCollect)	Food Security	Main reason why they cannot cook - Other	if other, please specify	text	HH
		104	HH interview (KoBoCollect)	Food Security	Coping Strategy Index (7 day recall period)	During the last 7 days, how many times (in days) did your household have to employ one of the following strategies to cope with a lack of food or money to buy it?	integer	HH
		105	HH interview (KoBoCollect)	Food Security	Coping Strategy Index (7 day recall period)	Shifting toward cheaper and less quality food items.	integer	HH
		106	HH interview (KoBoCollect)	Food Security	Coping Strategy Index (7 day recall period)	Borrowing food or asking assistance from relatives and friends	integer	HH
		107	HH interview (KoBoCollect)	Food Security	Coping Strategy Index (7 day recall period)	Reducing the number of daily meals	integer	HH
		108	HH interview (KoBoCollect)	Food Security	Coping Strategy Index (7 day recall period)	Consume less food during meals	integer	HH
		109	HH interview (KoBoCollect)	Food Security	Coping Strategy Index (7 day recall period)	Curbing the adult's need to ensure food need of children	integer	HH
		110	HH interview (KoBoCollect)	Food Security	Coping Strategy Index (7 day recall period)	What was the main source of the food in the past 7 days? (do not read out list)	select_one food_source	HH
		111	HH interview (KoBoCollect)	Food Security	Coping Strategy Index (7 day recall period) - Other	If other, please describe	text	HH
		112	HH interview (KoBoCollect)	Food Security	Access to Public Distribution System (PDS), by time and amount	Did your household have access to PDS (public distribution assistance system) in the past 3 months?	select_one YNDD	HH
		113	HH interview (KoBoCollect)	Food Security	Access to Public Distribution System (PDS), by time and amount	How regularly do you receive PDS assistance?	select_one freq	HH
		114	HH interview (KoBoCollect)	Food Security	Access to Public Distribution System (PDS), by time and amount	What items were included in your most recent PDS distribution?	select_multiple pds_items	HH

		115	HH interview (KoBoCollect)	Food Security	Access to Public Distribution System (PDS), by time and amount	If other, please describe	text	HH
		116	HH interview (KoBoCollect)	Food Security	Household members with priority access to food	Among the members of the household who is currently prioritized to access to food?	select_multiple priority	HH
What are the priority Livelihoods needs of the population residing in the target area and do they show any variation across population groups?		117	HH interview (KoBoCollect)	Livelihoods	Top income sources	What were your household's income sources over the last 30 days? (do not read out from list)	select_multiple livelihood_type	HH
		118	HH interview (KoBoCollect)	Livelihoods	Top income sources - Other	If other, specify please	text	HH
		119	HH interview (KoBoCollect)	Livelihoods	Household's total income in the past 30 days, by source	What was your household's total income in Iraqi Dinars over the last 30 days from the following sources:	integer	HH
		120	HH interview (KoBoCollect)	Livelihoods	Household's total income in the past 30 days, by source	Employment	integer	HH
		121	HH interview (KoBoCollect)	Livelihoods	Household's total income in the past 30 days, by source	Remittances	integer	HH
