### **INTENTIONS AND PROFILING IDPs IN IRAQ**

### CONTEXT

April 2022

The conflict in north and central Iraq, from late 2013 to 2017, resulted in large-scale displacement with 1.2 million internally displaced persons (IDPs) identified across Iraq as of March 31st, 2022. Of these, approximately 103,000 IDPs are estimated to be residing in informal sites.<sup>1</sup> REACH, in coordination with the Camp Coordination and Camp Management (CCCM) Cluster, has conducted this assessment in order to support strategic and evidence-based programming and inform inter-cluster coordination including shelter, WASH, health, food security, livelihoods, education, and safety and security. The assessment also highlights intentions and barriers to return data to support durable solutions actors in coordination and programming proritization.

### **METHODOLOGY**

The data was collected between 05 December 2021 and 26 February 2022 by REACH and partner organisations.<sup>2</sup> The assessment targeted informal sites hosting at least thirty families through household-level interviews carried out with 2,152 families and a key informant interview (KII) with each site leader. A total of 156 sites were covered, in 37 sub-districts. The results are representative at the sub-district level, apart from Al-Shamal, Markaz Sinjar, and Markaz Hatra sub-districts, where data was collected remotely. Findings for these sub-districts are therefore indicative. Additional details on the methodology can be found in the Terms of Reference, and the dataset and analysis are available here.

### **NATIONAL FINDINGS**

### LACK OF CASH/FINANCIAL RESOURCES

INFORMAL SITES

- Amongst the IDPs reportedly planning to integrate into the local community (56%), the top support needed for local integration was cash-for-rent programmes (50%);
- Amongst the 10% reporting facing challenges to access food from the site, the top reason was limited economic resources (54%);
- The main source of food in the past 7 days was purchased with own cash (69%), and cash assistance was mainly reported to be used for food (85%);

48%

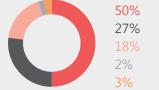

- Top 2 most reported healthcare access problems:
  - Cost of services was too high

### HIGH REPORTED LEVELS OF SHELTER DESTRUCTION

### Reported shelter damage to previous housing, in the Area of Origin (AoO):

Completely destroyed (100%) Heavily damaged (75%-99%) Minor damage (1%-24%) Do not know

### Reported shelter damage in current housing, in the Area of Displacement (AoD):

17%	Yes, completely destroyed (100%)
27%	Yes, heavily damaged (75%-99%)
23%	Yes, highly damaged (50%-74%)
18%	Yes, moderately damaged (25-49%)
12%	Yes, minor damage (1-24%)
3%	None of the above

### LIVELIHOODS AND EMPLOYMENT

- Looking for income opportunities was the second most reported reason for previous displacement (29%);
- Top reported source of income of the families surveyed was irregular employment, i.e. temporary or daily wage earning (71%);
- In the 30 days prior to data collection, 21% of IDPs in informal sites reported not having earned any income.

## NATIONAL KEY FINDINGS

### **MOVEMENT INTENTIONS**

Intentions for the 3 months following data collection:

Intentions for the 12 months following data collection:

Amongst those who did not report the intention to return during the 12 months following data collection, **53%** said they wish to return one day.

### Percentage of families reporting feeling free to pursue their movements:

90% Yes 7% No

7% No3% Do not know

Of those who reported not feeling free to pursue their movement intentions, the main reasons were: not having the financial resources (**73%**) and safety and security concerns (**40%**).

### **Top 3 most reported needs for re-settling, remaining, and returning<sup>3</sup>:**

### **RISK OF EVICTION**

### **Reported risk of eviction:**

Of those reporting that their families were at risk of eviction, the top three reasons were: authorities requested our community/ family to leave (**55%**), request to vacate from owner of building/land (**33%**), and lack of funds to pay rental costs (**11%**).

### **Reported movement intentions in case of eviction from site<sup>3</sup>:**

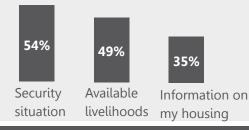

Remain in current location	28%	
Return to AoO	19%	
Move to another location	13%	
Move within governorate	25%	
Move to another governorate	2%	
Do not know	13%	

### ACCESS TO INFORMATION

**27%** of families who reported **not having accurate information** about their area of origin to take decision on whether to return or not.

**38%** of families reported **not knowing how to access services** 

### **Top reported AoO information gaps<sup>3</sup>:**

Top reported information gaps from humanitarian actors<sup>3</sup>:

- 1. How to get livelihood assistance 59%
- 2. How to get shelter (materials) 41%
- 3. How to register for receiving aid 33%
