

Non-displaced severity score

- 1
- 2

Displaced severity score

- 2
- Hard-to-reach*

Indicators included in calculation:

- % Households reporting use of latrines with walls and locks on inside of door
- % Households reporting use of latrines with internal source of light
- % Households reporting use of gender-segregated latrines
- % Households reporting presence of latrines reachable within 50m or less of the dwelling
- % Households reporting latrine accessibility for persons with disabilities
- % Households reporting presence of improved water source reachable in less than 30 minutes of travel total (by walking or available means of transport)
- % Households reporting females feeling not safe at water points
- % Households reporting females feeling not safe at latrines
- % Households reporting females feeling not safe at bathing areas
- % Households reporting males feeling not safe at water points
- % Households reporting males feeling not safe at latrines
- % Households reporting males feeling not safe at bathing areas

The data displayed on this map was collected as part of the Joint Multi-Cluster Needs Assessment (JMCNA) 2020, conducted by REACH. Results represent the JMCNA findings and should be viewed as indicative only. Data from different indicators were combined to obtain this composite indicator.

*For Hard to Reach districts, where data was not collected, figures are projected as the average value of adjacent districts.

Data sources:
Severity scale data: JMCNA (2020) - REACH
Administrative boundaries: UNDP (2020)
Coordinate System: GCS WGS 1984
